Student Management System by Queue

Eng: Hossam Magdy Afifi

Features :

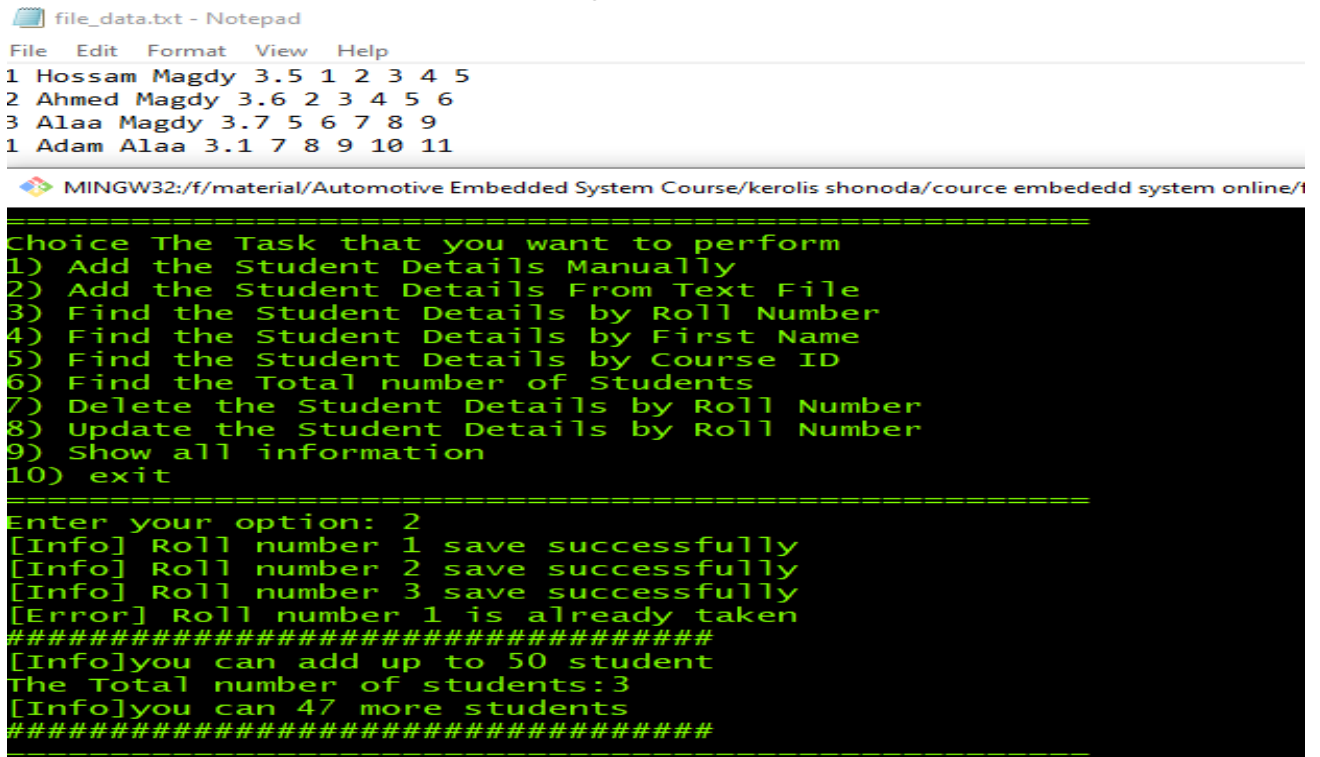

- 1) Add student data from file.
- 2) Add student data manually.
- 3) Find the student by the given roll number.
- 4) Find the student by the given first name.
- 5) Find the student registered by course id.
- 6) Total number of students saved.
- 7) Show all data of students.
- 8) Delete the student by the given roll number.
- 9) Update student by the given roll number.
- 10) Exit from program.

➤ Add student data from file:

Read data from file name is “file_data.txt”, check roll number of student in file is not the same by using function “F_checkRoll”, this function return Boolean number (True or False), if return true(1) this means roll number not saved before, either in the case of return false(0) print error because this student number already saved before.

```
99  /*function read data of students in file */
100 fifo_status Add_studentFile(fifo_buff* fifo ){
101     student_info *ptr = fifo->head;
102     int data,id[5];
103     float gpa;
104     char student_fname[20];
105     char student_lname[20];
106     if(!fifo->base || !fifo->head || !fifo->tail)
107         return FIFO_NULL;
108     if(FIFO_full(fifo) == FIFO_FULL)
109         return FIFO_FULL;
110
111     FILE *info_ptr = fopen("file_data.txt","r"); // read only
112
113     if( info_ptr == 0 ){
114         DPRINTF("file can't be read\n");
115         return FIFO_ERROR;
116     }
117
118     while(fscanf(info_ptr,"%d %s %s %f %d %d %d %d %d\n", &data, student_fname,student_lname,&gpa,&id[0],&id[1],&id[2],&id[3],&id[4]
119     {
120         if(FIFO_full(fifo) == FIFO_FULL){
121             DPRINTF("[Info]you can add up to 50 student\n");
122             DPRINTF("The Total number of students:%d\n",fifo->count);
123             DPRINTF("[Info]you can %d more students \n",50-fifo->count);
124             return FIFO_FULL;
125         }
126
127         if(F_checkRoll(data,fifo) ==0){
128             DPRINTF("[Error] Roll number %d is already taken\n",data);
129         }
130
131         else {
132             DPRINTF("[Info] Roll number %d save successfully\n",data);
133             ptr->roll = data;
134             strcpy(ptr->fname,student_fname);
135             strcpy(ptr->lname,student_lname);
136         }
137     }
138 }
```
